

INSTITUTE OF ACTUARIAL
& QUANTITATIVE STUDIES

Bridging the gap between Education & Career

Degree Programs in Actuarial Science
& Quantitative Finance

Full time Bachelor's Degree & Master's Degree Courses

Actuarial Science

Actuaries are the first professionals managing risk and modelling the financial impact based on the likelihood of future scenarios.

Actuaries are experts in:

- Evaluating the likelihood of future events - using numbers, not crystal balls.
- Designing creative ways to reduce the likelihood of undesirable events.
- Decreasing the impact of undesirable events that do occur.

Data Science

Large amount of data is generated by, and available to business and organisations. The ability to take data, to be able to understand it, to process it, to extract value from it, to visualize it, to communicate it sums up the role of a data scientist in the simplest of terms.

Data Science converts crude data into meaningful products that can be used by industries to generate insights and recognize market trends. With a dearth in the supply of specialized Data Scientists and a rapid increase in demand, this stands as a great career choice for students.

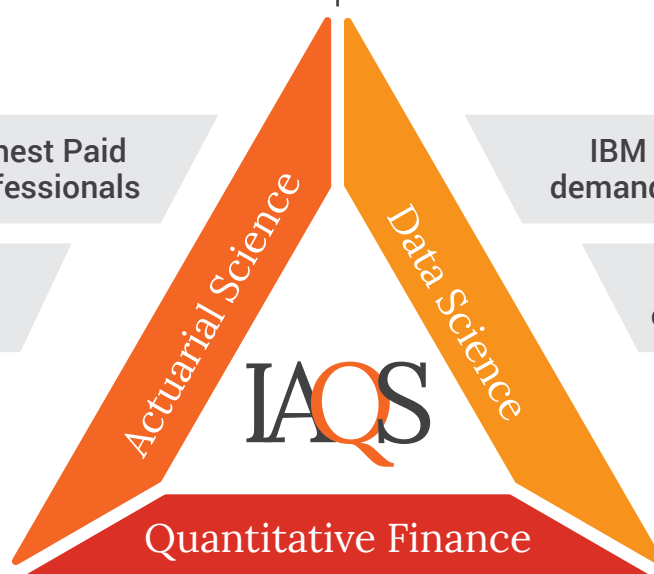

actuaries are among **TOP 25** Highest Paid Professionals

only **439** actuaries in India

#11 200 jobs

IBM Predicts demand growth **28%** by 2020

experience over 5+yrs. **₹75** Lacs annum

Quantitative Finance

The financial engineers (Quant Analyst) are specialists making use of mathematical formulas, programming and engineering methods in financial theories, and analyses market trends to build data-backed financial models.

The primary responsibility of a financial engineer/ Quant Analyst is to have thorough knowledge of financial markets, its volatility and knowledge of financial theories.

As a financial engineer/ Quant Analyst, you can associate yourself as an employee of any reputed financial institution or setup your own consultancy or do both.
